Energy Therapy

“The Energy Therapy System which Improves the Self-Healing Power of Living Matters”

Fukatami Energy Research Group
Representative of Fukatami Co., Ltd.
Hisataka Kawagata

1. Introduction

The plasma energy hado measurement method described in this report is a new method that is useful in improving your temperament and constitution; correcting hereditary miasms; eliminating sins and trauma (sins from your past life, trauma from inside the womb/0-3 years old ~ high school); promoting the purging/elimination of environmental hormones, chemicals/heavy metals, etc, of pesticides and additives in the living environment and food, etc, atomic dust, and ultra-short wave radiation/electromagnetic waves, etc; and restoring the decreased function of DNA/RNA which is prevented from operating normally due to atomic dust, ultra-shortwave radiation/electromagnetic waves, and genetically-modified foods.

2. Principles of the Multi-dimensional Meridian Hado Program

The principles of the “multi-dimensional meridian hado program” comprises content indicated by their various hado names, with ying kotodama and yang kazutama for the hado code numbers. The multi-dimensional meridian hado program was completed using a hado measurement device (UIB) to analyze the code number of each hado name, and this method was named the plasma energy hado measurement method.

The universe conscious life form (God 999/central sun), conscious life form (soul 989), and consciousness resonate and synchronize, and plasma and light (photon) energy are led from chakra to the center meridian as chi/life energy, activating the physical body and three-dimensional body, and switching on the sleeping lightbody gene. This enables the body to rise in dimension/ascend, entering the ketheric body chakra from the causal body charka, opening one's eyes and synchronizing with the cyclic domains of the 5th and 6th dimension and the 6th dimension/void (core relief), and hado resonate with the chord body of the universe conscious life form (God/central sun). Then, the hado resonance

intensity was measured, and the natural healing power of the life form (+100 points) was measured.

Through this, the plasma energy hado measurement method, which enables hado measurement correction, was established as the “5th dimension/6th dimension energy cyclic domain system,” which activates life energy and enhances natural healing power.

3. Method

In the plasma energy hado measurement method, hado energy is measured using a hado measurement device UIB from the facial portrait of the hado energy therapy applicant, in accordance with the measurement procedures. The combined contamination, physical contamination, and spiritual contamination of the physical body and three-dimensional body is resonated with the three-dimensional, four-dimensional, five-dimensional, and six-dimensional “ring chain, quasi-crystal, amorphous, thallus, crystal, colloid, gel, grid” cycle, etc, and the synchronized life form, somatid, environmental hormones (metal toxin), microorganisms (virus, fungus), and hado non-resonant (negative resonance) energy are measured.

The energy that hado resonates (positive resonance) with the life form is transferred to the photo of the person being measured (applicant) and a cream (energy goods), and when the applicant applies the cream, body toxins are eliminated and non-resonant (negative resonance) hado energy is corrected to positive resonance, and natural healing power can be enhanced.

By measuring and correcting the hado energy of the life form as mentioned above, the principles of hado resonance can be programmed as the “multi-dimensional meridian hado principles” energy therapy.

It was determined that the hado kotodama names and the kazutama code number of the principles resonate and emerge as the causal hado of diseases caused by combined contamination. Correction and resolution of allergy symptoms and correction and recovery from dysautonomia, etc, are seen, and many members restore their natural healing powers, rise/ascend to the next dimension to the ketheric body, and experience health restoration.

Us humans, who have miraculously received life on Earth, with its miraculous and mystic beauty, have physical limits, but live by means of infinite emotional ties. In order to surpass these limits, advance our consciousness, and promote the growth of our souls, it is necessary to raise the lightbody to the next dimension (ascension).

4. Study results

In **hado energy measurement of the “multi-dimensional meridian hado program”** in the plasma energy hado measurement method, plasma/light (photon) energy is viewed as chi/life energy, and by measuring, transferring, and correcting the resonating kotodama/kazutama of the living body from Layers 1-38, the lightbody gene from the 3rd dimension to the 4th dimension/5th dimension is switched on, and the Layer 37 27th dimension ketheric body chakra can be entered. This enables the consciousness, soul (conscious life form) and God (universe conscious life form, Layer 38 28th dimension) to be synchronized.

The “point” in the 4th dimension was measured to resonate with the 0 dimension, “line” in the etheric body chakra in the 5th dimension with the 1st dimension, “plane” with the 2nd dimension, “space” of the astral body chakra with the 3rd dimension, “time-space” with the 4th dimension, “parallel universe” of the mental and causal body chakra with the 5th dimension, and “void/core relief” of the ketheric body chakra with the 6th dimension.

Furthermore, the resonance of hado energy with the chord body “void/core relief” of the 6th dimension was also measured.

In the “multi-dimensional meridian hado program,” the cycle resonance of “ring chain, quasi-crystal, amorphous, thallus, crystal, colloid, gel, and grid” of the 3rd dimension, 4th dimension, 5th dimension, and 6th dimension were measured as the hado energy of the life form, somatid, environmental hormones (metal toxins), and microorganisms (virus, fungus) and displayed.

This “multi-dimensional meridian hado program” was revised on November 17, 2010 as the “5th Dimension/6th Dimension Energy Cyclic Domain System,” that is, the “multi-dimensional meridian hado program.”

5. Lucky charm, nicknamed “super e charm” (chi of ying-yang tai-chi/super energy)

This charm generates super energy. It works really well (ii, in Japanese), and was therefore nicknamed the “super e charm.”

The “super e charm,” which generates super energy of ying-yang tai-chi such as that described below, has a semiconductor-type function that generates and activates chi energy like plasma, light, photon energy, and far-infrared rays.

This semiconductor-type presence is said to purify the problematic areas of people, objects, and the earth by stabilizing the blood vessels, and enhances power.

The birth of a truly simple, safe, and low cost charm with “protection and purification/activation” functions appears to be the request of God and the times. This energy can be expressed in the following symbolic formula. In other words, the energy

hado resonates proportionally as chi of ying-yang tai chi/super energy.

Energy that proportionally hado resonates to yang chi

= Super energy = Deep self regard and respect for the life form \times Consciousness to the third power (consciousness \times conscious life form "soul" \times universe conscious life form "God/central sun").

Super energy = SE: Super Energy, Deep self regard and respect for the life form = L = Life body of My love mind and Respect, consciousness = C = Consciousness to the third power (consciousness \times conscious life form "soul" \times universe conscious life form "God/central sun") = $S E = L C^3$. whose formula is assumption.

Energy that proportionally hado resonates to ying chi

=**Spirit** energy = Spirit \times Globe to the third power (Globe \times center of the Globe \times grounding "zero magnetic field").

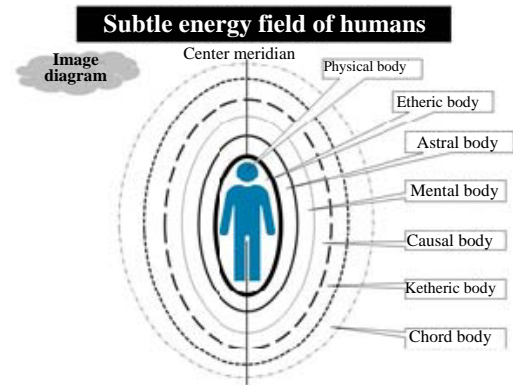

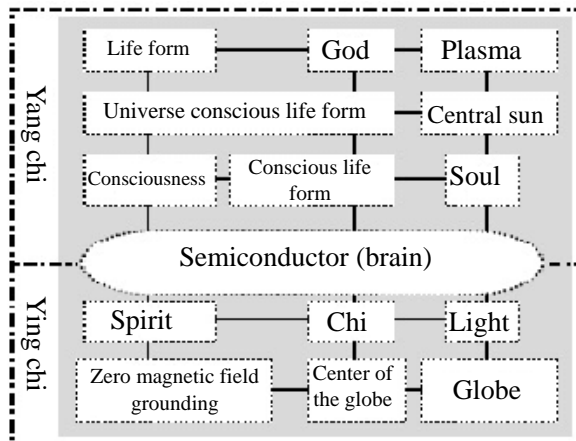

Spirit energy = SE = Spirit Energy, Spirit = S = Spirit, Globe = G = Globe to the third power (Globe \times center of the Globe \times grounding) = $S E = S C^3$. whose formula is assumption.

Yang chi + Ying chi = $L C^3 + S C^3$ = Chi (+ 100) = hado resonates in proportion to natural healing power +(100)

In an extremely large sense, it considers human fate to be to thank God, love all of nature and the Earth, and to protect this and pass this on to the next generation.

This "super e charm" can be used to protect yourself and your family, and if you give out kotodama with strong and good hado and refine your spirit by enhancing your chi/life energy, it is assured that you can realize a fulfilling life that is in line with your fate.

(Reference) Image of "energy resonance diagram of life forms" created by the hado measurement of life forms

Humans are said to be a life form that recognizes the presence of Something Great. The conscious life form can be expressed as the soul, and the existing universe conscious life form is God.

By passing the chi/life energy of the plasma/photon of the existing universe conscious life form (God) through the center meridian, it was possible to dramatically activate life form energy. As a result, the lightbody chakra “etheric body, astral body, mental body, causal body, ketheric body, and chord body” and the center meridian will be “in the 5th dimension and 6th dimension domain.”

This Research Group refers to this sequence as the **"5th Dimension/6th Dimension Energy Cyclic Domain System."**

6. Application of results

Energy therapy and the "5th Dimension/6th Dimension (God) Energy Cyclic Domain System" (3rd dimension~6th dimension domain) to enhance the natural healing power of life forms.

Plasma/Energy Hado Measurement Method (measurement, correction, and research) Hado Measurement Procedures

After the “Fukatami Energy Research Group Admission Photo Hado Measurement Application” is received, measurement is started using the applicant's photo.

- (1) The points of each hado of immunity, nerves, acidity, platelets, ultra-short waves, lymphocytes, radiation toxins, radiation x-rays, mineral balance, vitamin balance, hormonal balance, chromosomes, and natural healing power are measured as the

pilot codes, and the priority items for which the applicant most requires hado correction at the current time and direction are measured and confirmed.

(Refer to the [UIB hado measurement list using the UIB hado measurement device](#) ; ascension to the ketheric body; [trans-fatty acid measurement correction cases; A/B/K](#))

- (2) Sins, trauma, temperament, and constitution are measured and corrected.
- (3) Gene (DNA/RNA) damage and chromosomal abnormalities are measured based on the human genome map (under the editorship of the Ministry of Education, Culture, Sports, Science and Technology; March 25, 2006), and the presence of diseases caused by hereditary factors and cells/mitochondria associated with other diseases are measured and corrected.
- (4) Correction of diseases and symptoms that harm one's health
Incurable diseases such as congenital disorders, various syndromes (e.g. Asperger's syndrome, prenatal disorders, etc) associated with autosomal dominant /autosomal recessive mucopolysaccharidosis, pseudo-mucopolysaccharidosis, congenital hormone and metabolic disorder, congenital vitamin metabolic disorder, congenital hemolytic anemia, etc, skin inflammation, and organ diseases, etc. Correction and elimination of diseases associated with hereditary amyloidosis, amyloidosis and medullary thyroid cancer associated with myeloma, endocrine amyloidosis and Type II diabetes, localized atrial amyloidosis, hereditary amyloid cerebrovascular bleeding, Alzheimer's dementia (Down syndrome), senile TTR amyloidosis, prion amyloidosis, Creutzfeldt-Jakob disease, generalized and immune amyloidosis, etc, and trans-fatty acids and pheocromocytes that are generated by decreasing liver function; and measurement and correction of the "blood-brain barrier" measured as a cause of spiritual disorders and incurable diseases associated with immune-mediated hemolytic anemia and thrombocytopenia, pure red cell aplasia (PRCA) myelopoietic disease, and central nervous system damage are conducted.
For (4), the negative resonance between spiritual disorders and post-traumatic stress disorders, etc, which is the cause of many diseases, current conscious emotions and conscious emotions in the womb before birth, and sins is measured and corrected.
- (5) If you were exposed to atomic dust or ultra-short wave radiation (electromagnetic waves), etc, the radiation generated in the body by the radiation emitted from the more than 126 elements comprising the tissue cells are measured and corrected.
- (6) Damage to the body by genetically modified foods and antibiotics, etc, that cause blood abnormalities and damage DNA/RNA or substances and toxins such as

multi-drug resistant organisms and environmental hormones are measured and corrected.

- (7) Measurement and correction of various regions of the body contaminated by toxins; cerebral cortex, basal ganglion, diencephalons, pons and cerebellum of the central nerve of the heart diameter; medulla, eyes, ears, pituitary body, spinal cord, cerebrospinal fluid and blood vessels, and heart; resonance between various nerve tissues and gods; pelvis, lower limbs and upper limbs; lungs, trachea, nose, and skin as the respiratory system of the lung meridian; male reproductive organs and urinary organs of the large intestine meridian, small intestine meridian, liver meridian, bladder meridian and the triple energizer meridian; female reproductive organs, mammary glands and breasts; pericardium diameter; esophagus, stomach, duodenum, pancreas, bones and teeth, oral cavity, thyroid gland to hormones of the stomach diameter; PH (medullary PH nerve), body fluid, blood globin, arteriovenous blood flow to lymph tissue; spleen meridian and gall bladder meridian, hepatitis of the liver meridian and trans-fatty acid and generation of pheochromocytes. Measurement and correction of the cerebral arteriole "blood-brain barrier" that is damaged by drug toxins, viruses, fungal toxins, and spiritual damage. Measurement and correction of allergy diseases, dysautonomia, and autoimmune diseases.
- (8) The causes of blood disorders are generally said to be viruses and fungi, but the item that is measured and corrected in the most focused manner are somatids. Somatids, which are involved from gene precursors, contribute to the normalization of genes (DNA/RNA) and chromosomes and the formation of antibodies. In this Research Group, the somatid cycle *Note 1 <appendix, [kotodama hado of somatids](#) and grid kotodama> is measured, and cycle hado of the ring chain of emotions, metal toxins, viruses, and fungi that negatively resonate is performed, and hado correction that activates life form energy is conducted.
- (9) Hado resonance measurement and correction of chakra and the meridian, which connects the spirit and consciousness of the applicant and the universe, central sun, and God, and activates plasma/light (photon) energy, is conducted. This Research Group works to realize the rise in dimensions and restoration of health by analyzing the numerous kazutama hado codes and measuring and correcting the kotodama hado. After checking the measurements and correcting approximately 1,000 codes per day over a 10-day period, amounting to a total of approximately 10,000 codes (codes that negatively resonate among the over

17,000 codes in the kotodama hado table), hado resonance and correction is conducted to return the person's body and mind to an innocent, newly-born condition, and the hado measurement points for natural healing power and immunity, etc, are increased to +100.

7. The "5th Dimension/6th Dimension (God) Energy Cyclic Domain System" Model

The "[multi-dimensional meridian hado program](#)" aims to awaken the spirituality of the client and enhance his or her natural healing power. The chi/life form energy of plasma/light (photon) that enters through the 13 chakra of the body and "omega chakra (complete realization), alpha chakra (light language) * Note 2" is activated in the semiconductor (brain) and radiated as "ions" of the "anterior nuclei of thalamus of the brain." This ion hado resonates with over 250 nuclei including the cell nuclei of the entire body, enhances the power of the life form energy of each tissue and cell, corrects and eliminates body toxins such as infectious toxins produced by viruses and fungi and environmental hormones, etc, eliminates the spiritual disorder negative hado through the divine spirit positive resonance hado correction of the gods, and enhances natural healing power and immunity. Furthermore, the measurement and correction of "integration of past life, present life, and future life and circulation of the soul/reincarnation in the same body" was verified, leveling up the lightbody, and rise into the dimension "ketheric body *Note 3" (ascension) was measured and verified. Through this enhancement in spirituality, consciousness/immunity/natural healing power becomes +100, and this natural healing power corrects and eliminates the negative toxins that you have mistakenly taken in and makes the hado positive. In order to further increase energy, "tao"-related codes are measured and corrected, tao is implemented, the sex hormones are activated and energy circulation is promoted, and the energy of essence is increased to +100, leading to rejuvenation and activation of the applicant. Kotodama hado measurement of the latest "versatile cells/iPS cells" with the aim of physical rejuvenation has also become possible, and is effective in restoring health.

8. Research

- Measurement, research, and consulting work of health and temperamental disorders/personality disorders associated with temperament/constitution, sins, trauma, and post-traumatic stress disorder
- Gene appraisal by hado measurement. Hado measurement and research of the causes for damage to genes (DNA/RNA) and chromosomes and decrease in functional inhibition.
- Measurement and research of reincarnation, roots, and the association between the creator of the universe Something Great <God> and <sun><Earth><soul><spirit><consciousness> with regards to past life, present life, and future life.

9. Theory of the energy therapy “multi-dimensional meridian hado program”

(1) This is a hado therapy that resonates with “chi” and leads the multi-dimensional healing model, which resonates with photons and iyashirochi, and multi-dimensional spiritual energy (plasma/energy) to the meridian system.

This therapy can be used for healing/recovery and spiritual healing of incurable diseases (cancer, etc), lifestyle-related diseases, and psychosomatic disorders (including trauma), ascending to the next dimension, developing and raising chakra and spirituality (lightbody), obtaining a high-order astral body (lightbody), enhancing natural healing power, and being free of disease.

(2) The 13-layer theory concept measuring method that resonates with each item of the magnetic healing model of a private healer, such as the bones, nerves, glands, and emotions, etc, of the physical body and meridian system, is made into a three-dimensional model. Layer 14 “4th dimension” to Layer 38 “28th dimension” represent multi-dimensional energy that resonates with “chi,” and a multi-dimensional model was completed based on the hado measurement performance and technologies of over 20,000 hado measurement subjects over the past 15 years and healing that resonates with the detected hado correction code number.

(3) The multi-dimensional spiritual energy that resonates with chi was classified into the 4th dimension, 5th dimension, and 6th dimension. Next, these dimensions were built into the

model in order of the code number that resonates with each dimension, thus completing the model.

***The resonance and non-resonance with the spiritual energy of the high-order meridian hado program “multi-dimensional model for healing” are as follows:**

“6th dimension”

Chi, photon, iyashirochi, resonance Layer 38, 28th dimension Chord body Chord chakra Spiritual healing

“5th dimension”

Chi, photon, iyashirochi, resonance Layer 36, 27th dimension Ketheric body Ketheric chakra Spiritual healing

Chi, photon, iyashirochi, resonance Layer 36, 26th dimension Causal body Causal chakra Same as above

Chi, photon, iyashirochi, resonance Layers 33-35, 23rd-25th dimension Mental body Mental chakra Spiritual healing

Chi, photon, iyashirochi, resonance Layers 26-32, 16th-22nd dimension Astral body Astral chakra Spiritual healing

Chi, photon, iyashirochi, resonance Layers 20-25, 10th-15th dimension Etheric body Etheric chakra Spiritual and magnetic healing

“4th dimension”

Etheric/body contact surface and meridian system Same as above

Chi resonance; photon and iyashirochi non-resonance Layers 14-16, 4th-6th dimension Body and meridian system Spiritual and magnetic healing

Chi, photon, and iyashirochi non-resonance Layers 1-13, 3rd dimension Physical body and meridian system Spiritual and magnetic healing

Device used: The hado measurement device MRA is a device that measures the resonance between kotodama. The kotodama is converted to kazutama, and the resonance of the resistance value of electric energy of the kazutama code number is measured.

In terms of the **mechanism of effects on the human body** (relationship between human body healing and high-order structure), an example of the relevant kotodama codes are

shown in the appendix “Cyclic domain system of dimension domains and energy by Earth (terra) codes.”

©UIB device: This is the name of the MRA hado measurement device used by our Research Group, and is derived from the “bridge to the unknown” hado measurement device “UIB.”

U (friendship and courage) **I** (love) **B** (beauty, sun, fire)

UIB measures the resistance value of the unknown, using the Wheatstone bridge theory.

UIB is expanded to measure the unknown impedance of light, chi, consciousness, people, and materials, etc.

UIB measures energy after converting the kotodama of “human consciousness” to a kazutama hado code number.

UIB can measure energy resistance in units of ± 100 .

UIB corrects and converts the “kotodama of light, chi, body, consciousness, and materials, etc” for which the electric energy resistance of the kazutama code number were measured as being negative (non-resonance) to positive, as shown in the examples below.

(Example) In the case of Father A (non-resonant negative codes entered for markers)

(Eyeball hado - 1) \times (ocular pressure abnormality - 1) \times (glaucoma - 1)

\times (trans-fatty acids -1) \times (liver meridian -1) \times (liver -1) \times (liver tissue -1)

\times (irregular fatty liver -1) \times (exogenous lipids -1) \times (unsaturated fatty acids -1)

\times (beta-sitosterol -1) \times (plant sterol -1) \times (chylomicron -1) \times (fatty acid cholesterol -1)

\times (LCAT: lecithin cholesterol -1) \times (cholesterol ester -1) \times (metabolic disease -1)

\times (kidney meridian -1) \times (kidneys -1) \times (hypercholesteremia -1)

\times (drug-induced liver injury -1) \times (hematological disorder -1) \times (dysemia -1) \times (stress -1)

\times (self-resentment -1) \times (extreme anguish -1) \times (fear of cancer -1) \times (white blood cells -1)

\times (blood-brain barrier: endothelial cells in the cerebral arterioles -1)

\times (environmental hormones: toxins -1) \times (alcohol toxins) \times (VOC -1) \times (inorganic spirits -1)

Representative of the Fukatami Energy Research Group

Representative of Fukatami Co., Ltd.

The plasma energy hado measurement method “multi-dimensional meridian hado program” original version (up to Layer 36 26th dimension causal body chakra) was announced in a lecture at the 4th Integrative Medicine Japan (current IMJ Integrative Medicine Japan August 1, 2004 Sapporo). The program came up with the resonance and activation of the plasma energy of photons with semiconductors (KC 307).

Hisataka Kawagata obtained a hint to what would be the pillar of the program’s basic concept when he picked up a copy of Richard Gerber’s “Vibrational Medicine: New Choices for Healing Ourselves” (translation supervised by Keiichi Ueno and translated by Tashiro Manabe), published by Nippon Kyobunsha, which is said to be the bible of energy medicine on March 10, 2002.

The program started from research into energy medicine <Vibrational Medicine>.

* This table contains a strictly selected group of codes provided by Society members and correction codes detected in measurements, based on the Hado measurement / correction techniques accumulated over the last 9 years (from September 1996). The codes are mapped out in the order of resonance for each layer and dimension. I wish to express gratitude for being given the opportunity to measure the Hado of higher-order spirituality that resonates with "Something Great = God < Iyashrochi", photon and chi. I hope this program will contribute to the universe and peace for the human race, as I offer faith of love and gratitude.										
		MRA operator		Hisataka Kawagata (development of the model and the program, 4/13/2004)						
				The term "high-dimensional energy" was renamed to "multi-dimensional energy" on 5/1/2007						
				* Magnetic healing		Physical body, meridian		Layer 1 - Layer 13 3 dimensional model, non-resonant to chi		
				* Magnetic healing		Body, meridian		Layers 14, 15, 16 Resonant to chi		
				* Magnetic healing		Body / Etheric contact surface		Layers 17, 18, 19 Meridian		
				* Spiritual healing		Etheric body / chakra		Layer 20 - Layer 25 ↑		
				* Spiritual healing		Astral body / chakra		Layer 26 - Layer 32 ↑		
				* Spiritual healing		Mental body / chakra		Layer 33 - Layer 35 ↑		
				* Spiritual healing		Causal body		Layer 36 Resonant to chi ↑

“2012 model ‘Ascension program,’ a System which improves self-healing power of living matters,” was completed.
In order to surpass physical limits, advance our consciousness, and promote the growth of our souls, as human fate, it is necessary to raise the lightbody to the next dimension (ascension). The 5th dimension / 6th dimension (God) energy cyclic domain system
The “multi-dimensional meridian hado program” is an “ascension program” that improves self-healing power of living matters using kotodama and kazutama. If energy goods, such as “plasma energy causal sheet,” “super e charm,” and “super e charm T-shirt,” emerged out of this program, are utilized, and if you give out kotodama with strong and good hado and refine your spirit by enhancing your chi energy, it is assured that you can realize a fulfilling life that is in line with your fate.

ソマチットに共鳴する言霊波動

2010/11/17 川形 壽隆

次元領域	ソマチット言霊波動	共鳴する言霊波動	波動共鳴する古代の神々
三、0～6	宇宙ソマチットグリット	遺伝子(DNA)の前駆物質	アシュタール・シェラン(宇宙の人) 前世人類(ミッシングリンク)
三、0～6	超古代ソマチットグリット	化石の中のソマチット殻	
三、0～6	古代ソマチットグリット	貝化石の中のソマチット殻	
三、0～6	宇宙ソマチット	超高温・低温の中のソマチット殻	アメトコダチノミ 天之常立神
三、0～6	超古代ソマチット	塩酸の中のソマチット殻(ダイオキシン 等の血中不準物混入血液異常時)	クニトコダチノミ 国之常立神 サナート・クマラ(ミカエルの意識)
三、0～6	古代ソマチット	血小板・赤血球の中の ソマチット殻(血液疾患時)	トクムネノミ 豊斟淳神
三、0～5	ソマチットグリット		
三、0～6	ソマチット環状鎖		
三、0～1	ソマチット葉状体		イクビキノミ 活穢神
三、----	ソマチット準結晶	原始相	
三、----	ソマチット①	ソマチット	ウチキノミ 宇比地爾神
三、----	ソマチット②	孢子	スイチキノミ 須比地爾神
三、----	ソマチット③	二重孢子	ツビキノミ 角穢神
三、0---	ソマチットアモロファス	四次元	
三、0---	ソマチット④	バクテリア形態	
三、0---	ソマチット⑤	二重バクテリア形態	
三、0～2	ソマチット結晶	四次元	
三、0～2	ソマチット⑥	棒状形態	
三、0～2	ソマチット⑦	二重孢子を持つバクテリア形態	
三、0～2	ソマチット⑧	粒状の二重孢子を持つバクテリア形態	
三、0～2	ソマチット⑨	球状の細菌形態	
三、0～2	ソマチット⑩	球状の細菌形態	
三、0～3	ソマチットコロイド	五次元	
三、0～3	ソマチット⑪	破裂	
三、0～4	ソマチットゲル		
三、0～4	ソマチット⑫	酵母形態	
三、0～4	ソマチット⑬	子のう孢子形態	
三、0～4	ソマチット⑭	のう形態	
三、0～4	ソマチット⑮	菌糸体形態	
三、0～4	ソマチット⑯	繊維状の葉状体	

Grit and Cyclic Chain of Human Immunodeficiency Virus (HIV)

Cyclic chain	Virus / Fungal Kotodama (spirit of language)						
Grit	AIDS • V		Hepatitis	Hepatitis A virus	Hepatitis TT virus	Hepatitis G virus	Cerebral chromycosis
Quasicrystal	"	Human papillomavirus	"	Hepatitis A/C virus	"	"	65/Cerebral chromycosis
Amorphous	"	HHV-6	"	Hepatitis A/D virus	"	"	"
Crystal	"	HHV-7	"	Hepatitis A/B/E virus	"	"	66/Cerebral chromycosis
Gel	"	HHV-8	"	Hepatitis A virus	"	"	"
Thallus	"	"	"	Hepatitis E virus	"	"	67/Cerebral chromycosis
Colloid	"	New herpes virus	"	Hepatitis A virus	"	"	"

AIDS • V and sexually transmitted herpes virus were measured to be in resonance with infatuation spirits, which caused negative evolution.

Other HIV were measured to be in resonance with earthbound spirits.

3 people have made recoveries with acquired immune deficiency syndrome (AIDS) measurement and Hado correction.
